Katherine Rowan, D.V.M.

To: _____:

This letter is to confirm that your pet, _____, is scheduled for surgery on _____. Our surgery check-in time is 8:00am. Please allow 15 to 30 minutes the morning of surgery for the check-in process.

Enclosed you will find a surgery release/pre-op form. **Please read and complete this form, and bring it with you the morning of surgery.** Pre-anesthetic bloodwork gives the doctor an inside look at your pet's vital internal organs. We are especially concerned with the health of the liver and kidneys, as these organs help the body get rid of the medications used during the anesthesia. **We strongly recommend completing this simple bloodwork to ensure the safety of your pet.**

PRE-SURGERY CHECKLIST

Please remove all flea and tick collars one week prior to surgery.

- Remove all food at 9:00 p.m. the night before your pet's procedure, and remove all water by 6:00 a.m. on the morning of the procedure.
- Complete/Sign Surgery Release/Pre-Op Form
- Bring all of your pet's current medication and food (one to two meals)
- Give lots of extra pats and kisses

All surgery patients at Brookeville Animal Hospital, LLC are closely monitored with state of the art instrumentation. Our patients are monitored with a pulse oximeter and heart monitor. These technologies, along with pre-anesthetic screening and pre-placed intravenous catheter, help`1 reduce the risk of anesthesia to its lowest level. Your pet will receive an analgesic injection to minimize any pain that might be experienced post-surgery.

If you have any questions regarding pre-anesthetic blood testing or your pet's upcoming procedure, please don't hesitate to call.

We look forward to seeing you!

Sincerely,

The Doctors and Staff at Brookeville Animal Hospital, LLC
